Subject index to Volume 6(1975)

Blood groups and biochemical polymorphism in cattle

Agglutinability of cattle red cells. 3. Conglutination: J. Sellei 31

Agglutinability of cattle red cells. 4. The effect of antiglobulin in comparison with treatment by pronase: J. Sellei 41

Alterations in reactivity of the blood factors of cattle red cells after pronase treatment: J. Sellei 49

Gene dosage and antigenic expression on the cell surface of bovine erythrocytes: Suzanne Ostrand-Rosenberg 81

Note on a third allele in the erythrocytic NP system of cattle: M. Ansay 121

Association between α_{s1}-, β- and $\varkappa$-casein loci in two Italian cattle breeds: G. F. Voglino and I. Carignano 175

Removal of blood group determinants from bovine erythrocyte membranes. 2. Degradation of ghosts by butanol and pyridine: G. L. Zink and H. C. Hines 235

A MTT-linked spot test for the detection of 'silent' phenotypes of purine nucleoside phosphorylase (NP) in cattle erythrocytes: M. Ansay, V. Baldewijns-Rouma and J. E. Smith 249

Blood groups and biochemical polymorphism in pig

$E^{abgmnop}$ (= E^{15}), a new allele in the E blood group system of the pig: J. Linhart and J. D. Romanov 57

Isoimmune anti-A blood group reagents in pigs: J. Hojný, J. Hradecký and F. Jílek 101

Adenosine deaminase in the pig: tissue-specific patterns and expression of the silent ADA^0 allele in nucleated cells: J. Widar and M. Ansay 109

Allozymic variation as an estimate of heterozygosity in Belgian pig breeds: J. Widar, M. Ansay and R. Hanset 221

Blood groups and biochemical polymorphism in sheep

R receptors on lymphocytes of sheep: D. O. Schmid and S. Cwik 61

Erythrocyte oxidized glutathione in Australian Merino sheep: P. G. Board 65

Transferrin polymorphism in Herdwick sheep: Susan C. Collis and G. C. Millson 117

Blood groups and biochemical polymorphism in birds

Genetic control of phosphoglucose isomerase isozymes in the Japanese quail erythrocytes: R. K. Juneja and M. Wilhelmsson 3

Relationship of *B* blood group locus to skin allograft in chickens: Yoshio Yamamoto 19

A genetic role of isozyme types in plasma alkaline phosphatase activity in the young chicken: Yoshinori Tamaki, Shozo Watanabe and Yukio Yamada 185

Further studies on the genetic control of chicken plasma alkaline phosphatase isozyme: Yoshinori Tamaki 195

Blood groups and biochemical polymorphism in fish

Biochemical polymorphism of starry flounder, *Platichthys stellatus*, from the northwestern and northeastern Pacific Ocean: Allyn G. Johnson and Alan J. Beardsley 9

Myoglobin polymorphism in the pollan (Osteichthyes: Coregoninae): A. Ferguson 25

Population differences of aspartate aminotransferase and peptidase in the bay mussel *Mytilus edulis*: Allyn G. Johnson and Fred M. Utter 71

Esterase polymorphism in the Adriatic sardine (*Sardina pilchardus* Walb.). 1. Electrophoretic and biochemical properties of the serum and tissue esterases: M. Krajnević-Ozretić and R. Žikić 201

The use of carp, *Cyprinus carpio* (Linnaeus, 1758), instead of rabbit as antibody donor in immunological research on fishes: A. Herzberg 215

Retina-specific LDH isozyme in blueback herring, *Alosa aestivalis* (Mitchell), and alewife, *Alosa pseudoharengus* (Wilson): Joseph A. McKenzie 245

Miscellany
Electrophoretic variation of red cell enzyme systems in farm animals (Review): E. M. McDermid, N. S. Agar and C. K. Chai 127

Society news
ISABR Sheep Comparison Test 63
Pig Comparison Test 248
